ST. LOUIS ADOPTS HOME PARK IDEA

What Western City Is Doing to Beautify Itself.

ONE TRAVELS IN 3 CENTURIES

Old Area Has Mouses and Business Places Crowded Into Narrow Space - Few Large Parks Established-Next Era Born of World's Fair-Parks in New Subdivisions.

St. Louis, Mo., July 10 .- In the St. Louis area of over sixty-one square miles there is room for extensive travel. From day to day and year to year many journeys may be made which reach in idea from one century to another and beyond the limits of St. Louis into those of scores of cities and hundreds of growing towns, which will soon be cities, that ought to be famed for their beauty and famed at the same time as typical cities of the Southern, Southwestern, and Western

One of many such journeys, made by the writer for similar purposes, from Proadway back to Broadway, St. Louis, carried him across the limits of one century into another, with a line of difference between the centuries so plainly drawn that no one can mistake it or its meaning in the promise of great advance. not only for St. Louis, but for other cities of which St. Louis will become typical more and more as it becomes more and more fit to be followed in the advance it is making into its own future.

Journey Takes Three Hours. This journey of three hours was made with the intention of crossing the lines of 1859-69, first into those of 1879-89 and then into those of 1909-19. The route was first that of electric cars, bound north and northwest from Central Broadway. It that of drawing as fully as possible upon was then west, south, and east, back to the vast reserve powers of nature, which Central Broadway. It took in perhaps can work only in the open air, into the twenty square miles. One of its main service of the American city home-not Grows Rapidly in Commerce points of view, with the idea of two different centuries cornering on it, was a future will have hundreds of these private Grand avenue corner of the "old fair Between 1859 and 1869 St. Louis home parks, with tasteful private homes corner as a fringe of buildings, with and flowers, with statues and fountains NO LONGER AN ADOBE TOWN as a city might have been seen from this surrounding central areas of trees, shrubs, their smoke line following the Mississippi also for those who can afford them. in what would have seemed then the far distance, with a vast stretch of then unoccupied territory in what is now one of tieth century homes cannot afford to igthe most thickly built parts of the city. It is Europe. We want the thrifty and industricularly inviting all the States of the Mississippi Valley to the reopening of the agination of the past. 'great St. Louis Fair.'

Adds Fair Grounds to Parks.

When this history and all that the great typical home parks completed or pro- is an "adobe" town, and their surprise St. Louis Fair meant in connection with it closes, in entering a new period, the history of the typical city of the Southwest in the twentieth century opens on this same corner with St. Louis now beginning the work of adding the old fair on the same connection with the city and its suburbs. They is an adobe town, and their samples on visiting it is sometimes amusing. There is no city of its size in the United States that presents a more metropolitan or cosmopolitan appearance. Miles of paved business and resident streets, myginning the work of adding the old fair one parks completed or proposed in the city and its suburbs. They is an adobe town, and their samples on visiting it is sometimes amusing. There is no city of its size in the United States that presents a more metropolitan or cosmopolitan appearance. Miles of paved business and resident streets, myginning the work of adding the old fair or open-air enjoyment, makes them typically arranged electric. ginning the work of adding the old fair cai features of which have only to be carried out to ing is perhaps the greatest single evoluthrough the country affording the farmfair grounds part of one of the most city life. It has in it the compelling uce and to make their purchases, eight beautiful systems of public and private strength of fitness in the pursuit of greatparks in America or Europe.

city, it becomes more and more a system of use and beauty, because its only hard their purpose and they will be systematic building, erected at a cost of \$50,000, all the idea of making a city fit for an increasing number of workers whose life in and they will be fit. it will become more and more enjoyable through the presence of the things which

are naturally most fit to be enjoyed.

As the public park is the place in which which had over 2,000 acres in public parks at the close of the nineteenth century has added nearly 800 acres since 1901, and it is still increasing this acreage by opening stand now for a past in which this idea had not yet begun to control city life.

City Has Twenty-five Parks. With twenty-five parks under city con- will cross there by bridge and come to of commissioners, as in the case of Tower will begin at once. Grove and Shaw's Garden (the Missouri Botanic Garden), and with playgrounds and amusement parks running the total DAIRY FARM OF 1,300 ACRES up to over fifty, the city of the present and future would still have no assurance of unlimited development beyond that or the past if it were not for what is certain Ideal Cattle Barn Has Sides of Canto become a continuous development out of this higher idea of city life. It is a development to which there is no limit of evolution. As already visible in St. Louis, is now in evidence that its future extension will make the typical American home city of South and West in the age" far more beautiful and more enjoyable than the best cities of Europe during the mineteenth century or

The best feature of the typical modern city is the private home park, the "residence park," for which St. Louis, after a beginning only a few decades back, is already famous, even in Europe, whose the main line of the Georgia Southern critics, after seeing what St. Louis has Railroad and is one of the terminals of already done, have not hesitated to say that even now it is more beautiful in its new home district than any city of Eu-

System Is Not Complex.

The central idea which makes these St. Louis home parks a public system, with a general order controlling and harmoning all of them, is not complex. It can be grasped at once. When once grasped it insures orderly development, harmony for the whole with all its parts and at the same time entire freedom to follow the promptings of private good taste and the dairy forms in the South. sense of fitness as they must consult local needs and local demands.

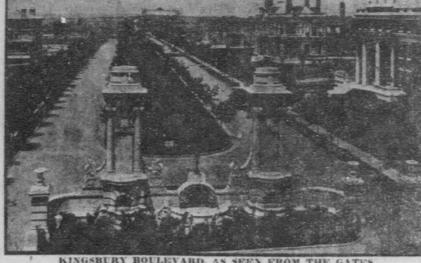

The immense pavilion-shaped barn con-Following the nineteenth century lines tains 210 milk stalls. It is lighted by elec of St. Louis as it fringed the river north and south from Broadway, the public outer wall is heaviest canvas cloth, park is found from point to point (if only which in hot weather is raised to the at too long intervals) to show that the roof and lowered during cold weather. past had a high sense of beauty. There are several towns at distances of from fourteen to twenty miles on the south. Theses are Reardan, Davenport, and Creston. Miles is on the of the Spokane and Columbia rivers meet The town was formerly Fort Spokane. Capt. John McA. Webster is the Indian

Springdale is three and one-half miles from the northeast corner of the reser-The work of the society during the cur- vation. At each of these towns there are ent year has been filled with stirring general stores and hotel and livery accommodations, while Reardan, Davenport, and Springdale have banks. These towns may be reached in a few hours' ride from Spokane, and from each is a good wagon road to the reservation

Land Desirable for Farming. The land is level and is covered with a scattering growth of yellow pine trees, which will yield from 500,000 to 750,000 feet, board measure, the quarter section gled. It should probably be rated as agricultural land of the second class. The

Indian Land May Be Leased.

by results attained with means at com- he quit it for the Audubon campaign. He has been, and can be, leased through the Indian agent. When an Indian dies his allottment on application of the heirs, is He has entirely abandoned shooting, how- sold by the Indian agent to the highest ever, as the duties required are too exact- bidder and the proceeds distributed among Under that charter the society was organized with a full board of directors and Mr. Heyward, the treasurer, belongs, of age, illness, or disability may be sold

Many of these allottments are irrigable from springs and creeks crossing their own boundaries and are suitable for the production of all fruits grown in this limate. Peaches and pears equal to the choicest fruits exhibited in our exposi-

Chamokane Creek, which bounds the trout streams in the Northwest. The reserve is a natural haunt for pheasants, grouse, and quali, and there is some big came. Heretofore whites were not permitted to hunt on these lands without permission from the Indian agent, and as an Indian never carries a shotgun, game

birds are plentiful. The mineral lands have never been opened to prospecting. The mineral belt, containing the great ledges of the Deer Trail country, crosses the reservation. The tungsten mines at Germania are on its border. Samples of copper, silver, ungsten ore of remarkable richness have brought out by prospectors who made secret excursions into the forbidden

Developing the Water Power.

The Washington Water Power Company of Spokane is developing an immense power at the Little Falls on the Spokane River, adjoining the lands to be opened. This will provide electric power for pumping and other purposes at a small cost, as the distance of transmission is short. Two-lines of electric railways are projected from Spokane to Miles. One of these will be built by the West Palm Beach, Fla. July 10.-The Spokane and Inland Empire Electric few eucalyptus trees that have been Railway system, headed by Jay P. Graves, few eucalyptus trees that have been who is backed by Chicago, New York, planted at different times in Florida have and Boston capitalists. This company alshown such adaptability to this soil that ready has more than 220 miles of electric as an experiment the Florida East Coast lines in operation in Eastern Washingof these trees propagated by William is within a few miles of the Coeur d'Alene
